

With fuel prices fluctuating up and down so sporadically over the past several years VinLux is implementing the following Fuel Surcharge program.

Using the Matrix Below, every month we'll adjust the surcharge according to the US DOE Cal ave (based on the ave. of the prior month). That fuel surcharge % will be in place for the following 4 weeks. You can access the US DOE average on their website at [www.eia.doe.gov](http://www.eia.doe.gov).
